

Do-it-yourself-TV:

Crafting instructions for young and old

Craft a fancy decoration for your favorite characters:

You need:

3 x Photo Paper (A3)

4 flat metal strips
(from German) filing
aids or similar

3 Buttons

2 lollipop sticks

Step 1: Print and cut

Print the templates (back, inside and front of the TV) out on photo paper in A3 format. Then cut out the individual parts.

Step 2: Folding and gluing

Place the back and inside of the TV with the unprinted side on top of each other. Fold both sheets at the same time along the respective lines, so that the shape of a box is created. Now glue the two parts together. Tip: Hide the tabs between the back and inside before gluing the parts together. Then you can glue the front to the orange flaps of the box.

Step 3: Attach feet

Bend the 4 metal strips first into a U-shape and then the respective ends outwards, as shown in the picture on the left. Then glue them e.g. with adhesive strips to the bottom of the TV.

Step 4: Attach antenna and buttons

Finally, stick the buttons on the front and attach the lollipop sticks as antennas with adhesive strips centrally on the back of the front of the television. The perfect decoration for your home is ready!
